

TEMPORARY PROTECTION FILM

POLYBAGS

If you're worried about damage to carpets or hard surfaces during building works, Polybags range of low tack adhesive protection films could be a solution. Manufactured from a durable waterproof polythene they are designed to protect surfaces without creating a trip hazard. These heavy duty puncture resistant protection films have been tried and tested for over 20 years and are colour-coded to ensure users apply the right film to the appropriate surface. The films provide a protection barrier against potential paint spills, dirty work boots, dust, grime and builder's mess, decorating, DIY jobs or even a party event. Rolls are reverse wound so no dispenser is required to apply the film and the low tack water based adhesive allows you to stick and easily remove the film when no longer needed.

Product guidelines

- For best performance store ideally at room temperature for 24 hours prior to use.
- Always test a small area before full area application as it is the users responsibility to ascertain the suitability of the product.
- When applying on a brand new carpet, please vacuum first in order to remove excess "fluff".
- Remove film within 4 weeks of covering to avoid potential 'Adhesive Residue'.
- On some surfaces the adhesive film may leave a residue, this can be easily removed using warm soapy water.
- Our films are NOT recommended for use on 100% Wool or thick pile carpets, rugs, loose fitting carpet tiles or worn carpets.
